"I have to take my hat off to Army training," he said. "I'll say one thing for Steve Colman-he sure knows what he's doing. Our son has produced some first-class work here." What in hell does he know about the Mafia?".Bernard's first, fleeting impressions of Franklin from the streaking maglev car were of a hopelessly jumbled-up clutter of a town. Unlike the neat and orderly models of urban planning that had replaced the heaps of American rubble during the recovery after the Lean Years--with business, entertainment, industrial, and residential sectors segregated by green belts and tidy landsculpting--everything in Franklin seemed to be intermingled with no discernible rhyme or reason. Buildings, towers, houses, and unidentifiable constructions of all shapes, sizes, and colors were packed together, overlapping and fusing in some places while giving way to clumps of greenery and trees in others. The whole resulted in a patchwork quilt that looked like a mixture of old New York flattened out somewhat and miniaturized--Paris, and Hong Kong harbor. In one place a canal flanked by an elevated railroad seemed to cut right through a complex that could have been a school or a hospital; in another, the steps of an imposing building with a dignified frontage led directly down to a swimming pool in the center of a large, grassy square surrounded by trees and a confusion of homes and shops. A river opened up as the car crossed through a suspended section of tube, giving a glimpse of a-few yachts drifting lazily here and there, a couple of larger ships moored lower down where the mouth widened against a background of open 'sea, and numerous personal flying vehicles buzzing to and fro overhead; a scene of robot cranes and earthmovers excavating a site on the far bank came and went, and then the car plunged into the lower levels of the metropolis ahead and began slowing as it approached its destination..hearts, wounded minds, torn spirits..Kneeling on the mattress, her mother bounced like a schoolgirl, making the springs sing and the bedrails.player was olive-skinned with Mediterranean features. "Oh... she's very good," Bernard said..Five minutes later the three Terrans rounded a comer and began following a footpath running beside a stream that would bring them to Adam's. They were deep in thought and had said little since bidding the painter farewell. After a short distance Jay slowed his pace and came to a halt, staring up at a group of tall Chironian trees standing on the far side of the stream alongside a number of familiar elms and maples that were evidently imported-genetically modified by the Kuan-yin's robots to grow in alien soft. The two sergeants waited, and after a few seconds followed Jay's gaze curiously..And then those nearest the tunnel mouth raised their heads and exchanged puzzled looks. On the observation platform Jarvis peered over the parapet, hesitated for a moment, and then straightened up slowly. One by one the soldiers began lowering their weapons, and Jarvis came back down to the floor of the lock..Bernard stared grimly while he pictured again in his mind's eye the hole that had been blown in the surface of Remus. "We've got. to stop it," he breathed. "We've got to get a message up there somehow.

It comes to the same thing--they end up getting shot anyhow..".How-how could you justify it?".ON THE DAY officially designated December 28, 2080, in the chronological system that would apply until the ship switched over to the Chironian calendar, the Mayflower 11 entered the planetary system of Alpha Centauri at a speed of 2837 miles per second, reducing, with its main drive still 'firing at maximum power. Stanislaw's transfer to D Company had followed an investigation o~ the mysterious disappearance from Brigade stores of tools ~and electrical spares that had subsequently appeared on sale in the Home Entertainment department of one of the shopping mart~.Bernard's expression was grave and distant. "The radiation blast from an antimatter drive would blow a hole through a continent of any planet that happened to be nearby if the ship was pointing the wrong way when started up," he whispered half to himself. "It's been up there in orbit, right under our noses all the time. They've got the biggest radiation projector anybody ever dreamed of-right there, riding out in space with the Mayflower II. They put kids and comic robots on it, and we never even noticed it."
